

Achieving best value by helping dependent smokers quit

Thursday 17 March 2016, 9.30-16.30
Aldersgate Room, Central Hall Westminster
Storey's Gate, Westminster, SW1H 9NH

Final Programme

09.30 - 10.00	Coffee & Welcome
10.00 - 10.20	Introduction: the teams in the room, the challenges we share. Dr Mike Gill.
10.20 - 11.20	Celebrate success by sharing real life examples (round table work)
11.20 - 11.30	Summary of key lessons about successes
11.30 - 12.15	What do the data tell us: variation in smoking attributable mortality, smoking attributable admissions and varenicline prescribing; three key messages. Dr Louise Restrick and Darush Attar-Zadeh
12.15 - 12.30	Coding tobacco dependence and interventions: capacity, opportunity and motivation? Dr Noel Baxter and Siân Williams
12.30 - 13.15	Lunch and networking
13.15 - 15.00	Workshop to develop the Right Care Pathway for Tobacco-dependent smokers from maternal exposure to smoking attributable deaths facilitated by Dr Mara Airoidi, Blavatnik School of Government, University of Oxford. Setting the context. What are trusts' short and medium term needs to deliver value? Where might there be alignment between treating tobacco dependence and these needs? To discuss value of the proposed metrics, and to suggest others.
15.00 - 15.30	Plenary, aiming for consensus about the right way to commission the whole pathway including hospital and community services that takes accounts of their short term and longer term needs to deliver value
15.30 - 16.00	Award ceremony + team photos
16.00 - 16.30	Tea and networking
